

Nyquist Systems introducing New QLink Workflow for TubeScan

BST eltromat – Unique Quality Assurance for Results that Count!

Nyquist Systems has expanded the TubeScan product portfolio with the new **QLink Workflow**, and has concentrated on **synchronization, data handling** and **error editing**. Nyquist Systems developed this solution for the customers who use the TubeScan system on print and cutting machines in parallel. With QLink, TubeScan systems can be used for the automatic control of cutting machines and stand-alone 100% inspection systems

QLink PRESS on printing press:

- Local high speed SSD data storage using latest technology
- Jobs accessible via LAN
- Highly compressed defect data to save on disk space
- Real-time roll map editing using QLink Editor
- Existing TubeScan system can be easily upgraded

QLink REWINDER on finishing machine:

- Select sealed roll from network
- Use local camera (QLink ICS) for synchronization and secondary inspection (no label or mark sensor required)
- Generate final roll report
- Existing TubeScan system can be easily upgraded

Experience Zones at LabelExpo Europe 2017, Brussels:

Live QLink on PRATI and SMAG machines on our BSTe Int / Nyquist Innovation Centre booth
Live TubeScan on multiple OEM booths, such as PRATI, SMAG, CODIMAG, MIYAKOSHI, GIDUE, etc.

BSTe India @ PackPlus 2017

BSTe India participated in the latest edition of PackPlus 2017 exhibition, one of the prominent exhibitions in India for Printing and Packaging industry. The exhibition was scheduled from 3 - 6 August at Pragati Maidan, New Delhi. The major emphasis was given on iPQ Center during the show and all our marketing efforts were revolving around our new iPQ Demo unit. We take an immense pleasure to inform you that, the iPQ Center demo unit is built in-house and was the main attraction in our booth.

The iPQ Center demo unit is currently equipped with iPQ Check and iPQ View modules, visitors to our stall were excited to know more about iPQ Center. Apart from iPQ Center, we also displayed our flagship products such as ARC_18, POWERScope 5000 and CLS PRO 600 demo units with the live web.

Our booth were visited by our existing and many new customers during the show. All of them were given a thorough information with the live demo of our products and they were quite impressed with our products.

We sincerely thank you for making our participation in PackPlus 2017 a great success and we look forward for your endless support in future too...

Few glimpses of PackPlus 2017:

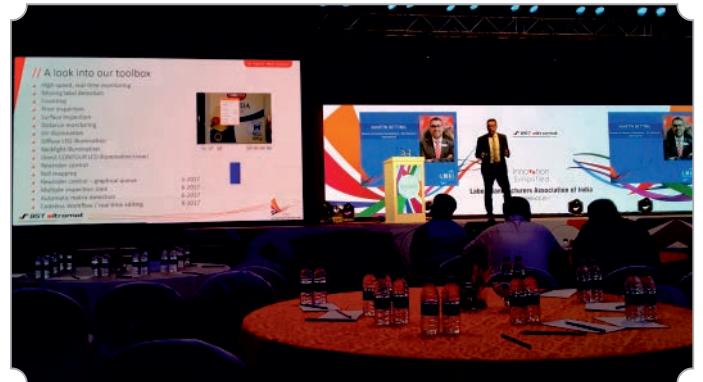

BSTe India @ LMAI Conference 2017

LMAI (Label Manufacturers Association of India) organised one of the biggest conference in India for Label & Narrow Web industry. BSTe India was one of the main sponsors of the LMAI conference. It was held at Jaypee Palace Hotel & Convention Centre, Agra from 20 - 23 July in Agra, India. The conference attracted the participation from over 175 countries, where more than 100 label manufacturers and more than 500 delegates present from the Narrow web & Label Industry.

BSTe India invited Mr. Martin Betting (Director- Business Development at BST eltromat International) for the conference and he addressed to the audience with a presentation on the TubeScan system. His focus was on "Low Cost and high quality narrow web viewing and inspection" for Indian market. He also presented the key features of TubeScan System's Hybrid technology.

We received a very warm response from the visitors of the conference and we also had an opportunity to interact with each and every delegate who attended the conference. We sincerely thank you for making our participation in LMAI Conference a great success and we look forward for your endless support in future too...
