## Inspection! Of the web! Of the time!

From an ordinary web video system

From Nyquist TubeScan / Eagle View

**Move on from ordinary web video systems that can only show a part of your repeat.**

See the full repeat with **TubeScan** and ensure 100% quality check of your print job.

Both the systems TubeScan Digital Strobe (TSDS) & TubeScan EagleView (TSEV) can be used in a variety of ways:

- Simple 100% web monitoring online with the entire repeat display
- Detection of missing labels and/or matrix residues online/offline
- 100% defect detection online with workflow integration with your re-winder
- 100% defect detection offline
